

Stile

Case Study

San Francisco Unified School District

Recently we sat down with Stile early adopters, Laura Spanier of A.P Giannini Middle School and Eric Lewis of the San Francisco Unified School District to ask them a few questions about how their experiences with Stile.

Eric Lewis

Laura Spanier

What attracted you to Stile initially?

Laura Spanier The material was super kid-friendly and really visually appealing.

Eric Lewis It was authentically interesting and engaging, and relevant and current. When looking at some of the other big programmes, and I've looked at a lot of them lately, the content seems already dated. With Stile, on the other hand, the content was so real and current like your lesson about the bees. I loved it.

What sets Stile apart from other platforms?

EL So many things. Having science as the sole focus, I think is excellent. Because as a science teacher, that's all I care about. Stile's content is really lovely. It's easy to use and to navigate for students and teachers, and it's all there in one place. I trust the content versus having to pull together different videos from all different places to augment to make an ED puzzle to pause then to make a Nearpod. With Stile, all that jumping about different platforms just isn't necessary. The concierge service makes a lot of sense to be able to use your people to help us get to the content we need to cover is so helpful and saves a lot of time.

LS Having the questions read to my students, rather than having to read them is a big plus that assists my students with literacy problems.

It's easy to differentiate and assign different lessons to students. The platform helps you create fascinating lessons, with varying types of questions to invoke various kinds of thinking and collaborative activities like classroom brainstorming. The option to embed and edit videos is impressive. It's really fun too.

How has the service you've received from Stile been?

LS I feel like we have a special status. So far, it's been fabulous.

EL I have loved it. Everyone I have met has been amazing. Everyone has been just extraordinary, really delightful to talk to. Everything has been super easy.

What would you tell someone contemplating piloting Stile?

EL It's a fantastic resource for excellent science that's engaging and attractive to view and easy to use. The platform that can be adapted for your needs, in lots of wonderful ways to find out about what your students know.

LS It makes it very easy to create engaging lessons. It's colourful, it's entertaining, it's interesting, and it's varied. It's a handy platform.

TEACHER FEEDBACK

What is your favourite thing about Stile?

"I like that Stile combines a platform for students to view their assignments as well as complete their assignments without having to use multiple different websites and logins."

"Flexibility in creating my own engaging content & really high quality science content lessons already prepared"

"I love that I can see student responses to share with the class immediately."

STUDENT FEEDBACK

We asked a group of 140
A.P Giannini Students if they
would agree with the following statements:
